Warranty Information

All parts and components come with a 1yr warranty.

Customer is responsible for the cost of any part and component replacements (including shipping charges) if the malfunction is due to issues within user setup or user error.

Craft Automation will facilitate a manufacturers warranty replacement of any part or component if the part issue is in fact deemed a factory defect by the manufacturer.

Craft Automation will cover the cost of a part and component replacement (including shipping charges) if a malfunction is due to engineering or programming error within the panel.

Craft Automation is not responsible for any onsite replacement installation of any part or component.

For any returned equipment the Warranty Processing Agreement must be signed and submitted by the customer.

Support Information

Craft Automation provides Remote Control Commissioning at no charge.

Onsite Control Commissioning is available for an additional charge.

Craft Automation happily provides customer phone support for the first year of use of our product.

Additional Tech Support outside the first year of use may be accommodated based on the scope of support requested; additional charges may apply.

For more information please request to see the Tech Support and Commissioning Outline.
